Program Intention

To create a stimulating and invigorating environment for you to grow through personal reflection, exercises and group interactions.

The Women in Leadership program is so popular with participants that many of the groups continue meeting after the completion of the first year.

At the conclusion of this program, participants will...

- Define their personal mission statement, vision for the future, and leadership strengths.
- Display the four areas of Emotional Intelligence.
- Comprehend the concept that leadership is a choice, not a position and gives examples of leaders who demonstrate leadership through their actions, not titles.
- Build a sense of community with their fellow participants.
- Stretch outside of their established comfort zones to solve problems and inspire others to do the same.

Participants benefit from:

- Defined path for reaching personal and professional goals
- Enhanced self awareness of personal strengths and weaknesses
- Improved leadership skills allowing each participant to advance their careers and lead in their communities
- A network of women who will be supportive for years to come

Testimonials

“Women in Leadership provided an opportunity for me to share what I’m experiencing in life and at work. It also provided a chance for me to learn from others. It’s amazing how all women are different but SO MUCH ALIKE! We could all relate. Ginny was great at creating an environment that fostered trust, learning and humbleness. While participating in this class I was able to refocus on work AND life and create a passionate vision for the future. Ginny is a great listener and quick to pull honest information from the class. This class created yet another family for me. Thank you.”

“Through the course of the year, I learned a great deal about my own strengths and weaknesses and that of those around me. Discovering that other successful women struggle with very similar daily events, thoughts and balancing decisions helped me to not be so critical of myself and to be more accepting of my leadership role. I would recommend this course to any woman who wishes to begin or grow in their career, whether currently in a leadership position or not.”
